

Managing Command Scripts

Main window

You can create a Command Script using the following scripting languages:

- C#
- VB.Net

You cannot change the scripting language of an existing Command Script.

You can create a Client Script or a Server Script.

You can add scriptlets to every script.

To get help on entering code, click ^{SDK}? in the **Command Script Editor** dialog box. The Bosch Script API help is displayed.

✓ To add a server scriptlet:

1. On the **Tools** menu, click the **Command Script Editor...** command.
The **Select Script Language** dialog box is displayed if no Command Script was created yet.
2. In the **Script Language:** list, select the required entry.
The **Command Script Editor** dialog box is displayed.
3. In the left pane of the **Command Script Editor** dialog box, right-click ServerScript and click **New Scriptlet**.
A new scriptlet is added.
4. Enter your code.

✓ To add a client scriptlet

1. On the **Tools** menu, click the **Command Script Editor...** command.
The **Select Script Language** dialog box is displayed if no Command Script was created yet.
2. In the **Script Language:** list, select the required entry.
The **Command Script Editor** dialog box is displayed.
3. In the left pane of the **Command Script Editor** dialog box, right-click ClientScript and click **New Scriptlet**.
A new scriptlet is added.
4. Enter your code.

✓ To delete a scriptlet:

1. Open the **Command Script Editor** dialog box.
2. Click the **Server Script** tab or the **Client Script** tab as required.
3. In the Event Tree, right-click the required event and click .
The scriptlet is removed.

To exit the Command Script Editor dialog box:

- Click .
